CHAMELEON 8

- Go anywhere, register everyone.**
 Chameleon 8 is an all-in-one registration and verification device that is rugged, lightweight, and easy to bring with you to any location.

No network, no problem!

Chameleon 8 works without an internet connection. Captured data is safely stored and uploaded as soon as the device is connected again.

Features

Long life removable battery

7600mAh battery capacity. Ideal for extended outdoor mobile operation.

MIL-STD 810G

Chameleon 8 is MIL-STD 810G certified.

Desktop application reuse

Reuse existing applications in a snap, thanks to the Windows 10 OS.

8" screen

The large screen allows you to fill in forms with a computer-like experience.

Camera

Our high-quality camera set captures and authenticate people and documents.

Read all documents

Read Passports and identity cards with contactless and contact chips, barcodes, and QR codes.

Easy app development

The combination of hardware modules and SDKs offers easy development of applications.

Online and offline

Works offline. Captured data is safely stored and uploaded as soon as the device is connected again.

IP67 case

Optional IP67 transport case to protect it against hazardous parts, dust and water.

MOSIP compatible

Chameleon 8 is compatible with identity frameworks like MOSIP.

Touch screen

10-point durable full color capacitive touch screen. Scratch resistant and sunlight readable.

Fast fingerprint capture

From FAP 20 to FAP 60, and flat or rolled fingers, and it's fast.

Applications

Secure identity

Secure identity registration and verification for both public and private services.

Elections

Pre-election voter registration, and verification of voters on election day.

Security

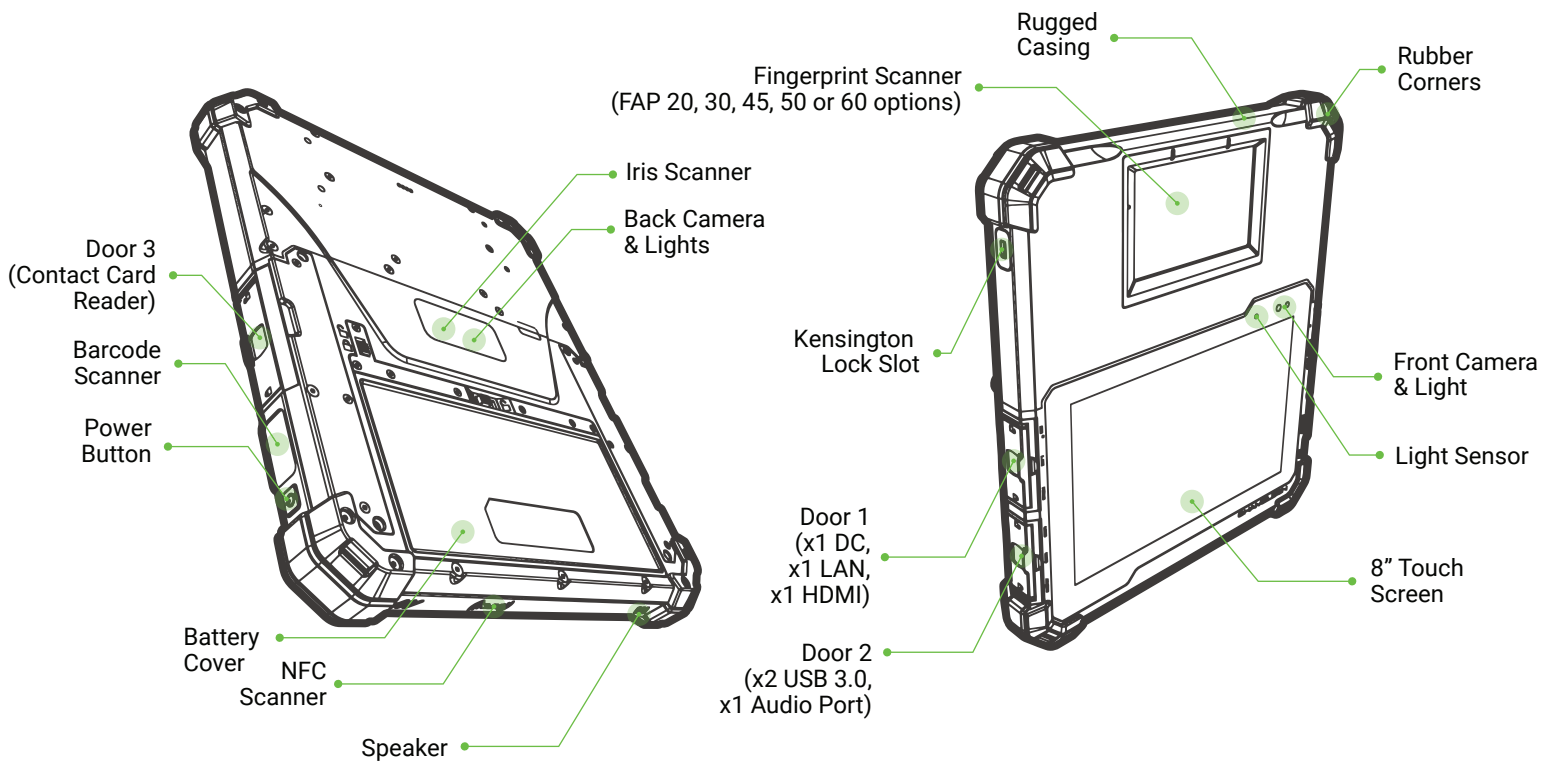

Verification of identity using combination of documents, biometrics and reference databases.

Travel

Border management at airports or remote sites, like on a bus, boat, or train.
